SECTION II

Crime Index Offenses Reported

CRIME INDEX TOTAL

DEFINITION

The Crime Index is composed of selected offenses used to gauge fluctuations in the overall volume and rate of crime reported to law enforcement. The offenses included are the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault, and the property crimes of burglary, larceny-theft, motor vehicle theft, and arson.

Year	Number of offenses ¹	Rate per 100,000 inhabitants ¹
1996	13,493,863	5,086.6
1997	13,175,070	4,922.7
Percent change	-2.4	-3.2

The Crime Clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

In 1997, the Crime Index total, estimated at approximately 13.2 million offenses, dropped 2 percent from the 1996 total. This decline represented the lowest annual serious crime count since 1985 and the sixth consecutive annual decline. The Nation's cities reported a decline of 3 percent collectively. Those cities with populations of 250,000 to 999,999 reported the greatest decrease, 6 percent. A 3-percent decrease was reported in the suburban counties, while the rural counties showed an increase of 1 percent.

Five- and 10-year percent changes showed the 1997 national total was 7 percent lower than the 1993 level and 5 percent lower than the 1988 total.

Geographically, the most populous Southern States accounted for 40 percent of the total volume of Crime Index offenses. The Southern States were followed in volume by the Western States, 24 percent; the Midwestern States, 22 percent; and the Northeastern States, 15 percent. Compared to 1996 figures, in 1997 the Northeastern States showed a Crime Index decrease of 5 percent. The Southern and Western States each showed a 2-percent decrease, and the Midwestern States showed a 1-percent decrease. (See Tables 3 and 4.)

July was the month in which the most Crime Index offenses occurred, and February was the month in which the least occurred.

December	8.3	8.4	8.1	8.2	8.2

Rate

Crime rates correlate the incidence of crime to population. The 1997 rate for Crime Index offenses—the lowest rate since 1974—was estimated at 4,923 Crime Index offenses for each 100,000 in United States population. The Nation's metropolitan areas experienced the highest Crime Index rate, and the rural counties experienced the lowest. (See Tables 1 and 2.) Nationally, the 1997 Crime Index rate fell 3 percent from the 1996 rate, 10 percent from the 1993 level, and 13 percent from the 1988 rate.

Regionally, Crime Index rates included 5,547 offenses per 100,000 inhabitants in the South, 5,335 in the West,

4,572 in the Midwest, and 3,734 in the Northeast. Rates in all four regions declined from 1996 to 1997. A 5-percent decline was recorded in the Northeastern Region; a 3-percent decline was reported in both the Western and Southern Regions; and a 2-percent decline was noted in the Midwestern Region. (See Table 4.)

Nature

Violent and property crime categories comprise the Crime Index. In 1997, of the total Crime Index offenses reported to law enforcement, 12 percent were violent crimes, and 88 percent were property crimes. The offense with the highest volume was larceny-theft, while the offense with the lowest was murder. (See Chart 2.3.)

Considering all Crime Index offenses, property valued at an estimated \$15.6 billion was stolen in 1997. The greatest losses were due to thefts of motor vehicles followed by jewelry and precious metals; televisions, radios, stereos, etc.; and currency, notes, etc. In 1997, law enforcement agencies nationwide recorded a 37-percent recovery rate for dollar losses in connection with stolen property. The highest recovery percentages were for stolen motor vehicles, clothing and furs, livestock, consumable goods, and firearms. (See Table 24.)

Law Enforcement Response

Making an estimated 2.7 million arrests for Index crimes in 1997, law enforcement agencies collectively recorded a 22-percent clearance rate for the total Crime Index offenses. Crimes can be cleared by arrest or by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. The arrest of one person may clear several crimes, or several persons may be arrested in connection with the clearance of one offense.

Throughout the past 10-year period, the Index clearance rate has remained relatively stable. Clearance rates in both 1993 and 1988 were 21 percent.

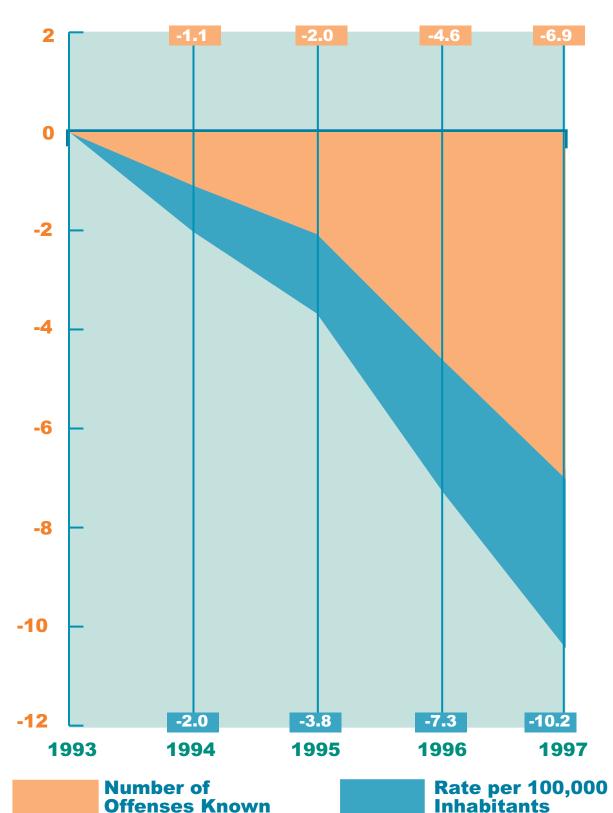

The 1997 total Crime Index arrests declined by 3 percent when compared to 1996 figures. Arrests of both adults and juveniles were down; 2 percent for adults and 6 percent for juveniles. Considering gender, arrests of males decreased 4 percent, while arrests of females showed virtually no change. (See Tables 36 and 37.)

Comparing figures from 1997 to those from 1996, declines in the number of persons arrested were shown for all but one of the individual offenses composing the Crime Index; aggravated assault increased by 1 percent. Decreases ranged from 8 percent for motor vehicle theft to 3 percent for larceny-theft as shown in Table 36.

At nearly 1.5 million arrests, larceny-theft arrests accounted for the highest volume of Crime Index arrests. (See Table 29.)

Regional Violent and Property Crime Rates 1997

per 100,000 Inhabitants

VIOLENT CRIME TOTAL

DEFINITION

Violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. All violent crimes involve force or threat of force.

Year	Number of offenses	Rate per 100,000 inhabitants
1996	1,688,540	636.5
1997	1,634,773	610.8
Percent change	-3.2	-4.0

In 1997, an estimated 1.6 million violent crimes were reported to law enforcement. This number, indicating a decrease of 3 percent from the 1996 level, represents the lowest total recorded since 1988. The 1997 estimated total was 15 percent below the 1993 level, but 4 percent above the 1988 total. From 1996 to 1997, violent crime decreased in the Nation's cities collectively by 4 percent and in the suburban counties by 2 percent. In contrast, an increase of 3 percent was recorded in rural counties.

Regionally, 39 percent of all violent crimes reported to law enforcement in 1997 were accounted for by the most populous region, the South. The other three regions reported lower volumes: 24 percent in the West, 20 percent in the Midwest, and 17 percent in the Northeast. All four regions experienced decreases in the number of violent crimes reported from 1996 to 1997. The Northeast and West registered declines of 5 and 4 percent, respectively; the South, 2 percent; and the Midwest, 1 percent. (See Table 4.)

Violent crimes occurred most frequently in July and August. The lowest total was recorded in the month of February.

Table 2.2 — Violent Crime Total by Month, 1993-1997 [Percent distribution]

November	7.9	7.8	7.9	7.8	7.8
December	7.9	8.0	7.9	8.1	7.6

Rate

The lowest national violent crime rate since 1987—611 per 100,000 inhabitants—was recorded in 1997. Two-, 5-, and 10-year trends show the 1997 rate was 4 percent lower than in 1996; 18 percent lower than in 1993; and 4 percent lower than in 1988. The Nation's metropolitan areas collectively registered 684 offenses per 100,000 population. The rate in cities outside metropolitan areas was 455 offenses per 100,000 population, and for rural counties, it was 231.

Considering violent crime rates geographically, the South and the West registered higher rates than the Northeast and the

Midwest. The South registered a crime rate per 100,000 inhabitants of 682; the West, a rate of 652; the Northeast, a rate of 536; and the Midwest, a rate of 526. All regions registered rate declines from 1996 totals, ranging from 6 percent in the West to 2 percent in the Midwest. The Northeast and South recorded 5- and 4-percent decreases, respectively. (See Table 4.)

Nature

In 1997, aggravated assaults accounted for 63 percent of all violent crime, the highest number of violent crimes reported to law enforcement. Robberies accounted for an additional 30 percent. Forcible rapes accounted for 6 percent, and murders accounted for the lowest number of violent crimes, 1 percent.

Although data concerning weapons used in connection with forcible rape are not collected, they are collected for other violent crime categories. In 1997, firearms were the weapons used in 27 percent of all murders, robberies, and aggravated assaults, collectively. Knives or cutting instruments were used in 15 percent of all violent crimes; other dangerous weapons in 28 percent; and personal weapons (hands, fists, feet, etc.) in 30 percent. The proportion of violent crimes committed with firearms has remained relatively constant during the past 5 years, ranging from 32 percent in 1993 to 27 percent in 1997.

Law Enforcement Response

The 1997 violent crime clearance rate was 48 percent, up from 47 percent in 1996. Violent offense clearance rates ranged from 66 percent for murder to 26 percent for robbery. Over half of all aggravated assaults (58 percent) and forcible rapes (51 percent) were cleared.

An estimated 717,700 persons were arrested for violent crimes in 1997. Violent crime arrests accounted for 5 percent of the arrests for all offenses and 26 percent of those for Index crimes. Regarding violent crime arrestees, 84 percent were males; 57 percent were white; and 83 percent were adults. (See Tables 38, 42, and 43.)

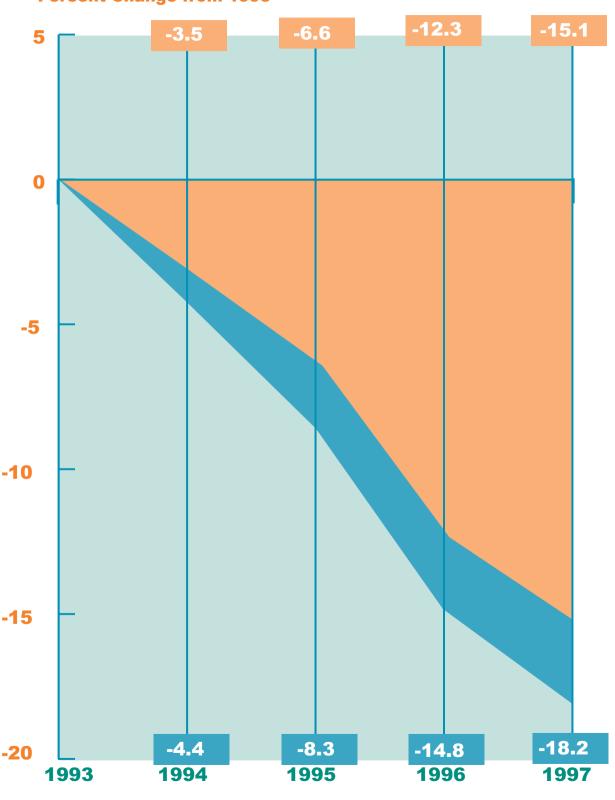

The total number of arrests for violent crimes showed a 1-percent decline in the Nation and a 2-percent decline in cities from 1996 to 1997. Increases of 3 percent each were noted for violent crime arrests in suburban and rural counties. Nationally, juvenile arrests (persons under age 18) decreased 4 percent, while adult arrests showed virtually no change from 1996 levels. (For a breakdown on persons arrested by city, suburban, and rural areas, see Section IV, Persons Arrested.)

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

	- TREND -	
Year	Number of offenses	Rate per 100,000 inhabitants
1996	19,645	7.4
1997	18,209	6.8
Percent change	-7.3	-8.1

The number of persons murdered in the United States in 1997 was estimated at 18,209, representing a 7-percent decline from the 1996 estimate. The 1997 figure also represents a 26-percent decline in comparison to the 1993 total and a 12-percent decline in contrast to the 1988 estimate. (See Table 1.)

When compared to 1996 figures, 1997 murder volumes in the Nation's cities dropped 9 percent. Decreases ranged from 14 percent in cities with populations of 250,000 to 499,999 to 5 percent in cities with populations of 10,000 to 49,999. Declines of 7 and 2 percent were reported in suburban and rural counties, respectively.

Regarding the four regions of the Nation, the most populous region, the Southern States, accounted for 43 percent of murders. The Western and Midwestern States accounted for 22 and 21 percent, respectively; and the Northeastern States accounted for the lowest percentage of murders, 13 percent. From 1996 to 1997 all regions showed declines in the number of murders. The Northeastern States, reporting 12 percent, and the Western States, reporting 11 percent, experienced the greatest declines. Decreases were also recorded in the South, 6 percent, and in the Midwest, 3 percent. (See Tables 3 and 4.)

Considering the volume of monthly occurrence, in 1997 murder was most frequently committed in July and least frequently committed in February.

Table 2.3 — Murder by Month, 1993-1997 [Percent distribution]

November	8.3	7.8	8.0	8.0	8.1
December	8.8	8.4	8.6	8.9	8.5

Rate

The national murder rate, down 8 percent from the 1996 rate, was the lowest since 1967, at 7 murders per 100,000 inhabitants. Trends for 5 and 10 years show that the 1997 rate was 28 percent lower than in 1993 and 19 percent lower than in 1988.

Regionally, the South averaged 8 murders per 100,000 people; the West, 7 per 100,000; the Midwest, 6 per 100,000; and the Northeast, 5 per 100,000. Compared to 1996 rates, murder rates in 1997 declined in all of the four geographic areas. The greatest declines were experienced in the West at 12 percent and the North at 11 percent. Smaller declines were reported in the South, 7 percent, and the Midwest, 5 percent. (See Table 4.)

The Nation's metropolitan areas reported a 1997 murder rate of 7 victims per 100,000 inhabitants. Rural counties reported

a murder rate of 5 per 100,000 inhabitants, and in cities outside metropolitan areas, the rate was 4 per 100,000.

Nature

In 1997, supplemental data for 15,289 of the estimated 18,209 murders were provided. These supplemental data, provided on a monthly basis by contributing agencies, consist of: the age, sex, and race of both victims and offenders; the types of weapons used; the relationships of the victims to the offenders; and the circumstances surrounding the murders.

Based on supplemental data concerning victims, in 1997 males comprised 77 percent of murder victims, as they did in 1996. Eighty-eight percent of murder victims were aged 18 or older; and 45 percent were aged 20 through 34. Considering victims for whom race was known, 48 percent were white and 49 percent were black. Persons of others races comprised the remaining 3 percent of murder victims.

In 1997, supplemental data for 17,272 murder offenders were also reported. Of those for whom age, sex, and race were reported, 90 percent of the offenders were males, and 87 per-

Table 2.4 — Murder Victims by Race and Sex, 1997

Total Victims ¹	15,289	11,799	3,466	24			

¹ Total murder victims for whom supplemental homicide data were received.

cent were persons aged 18 or older. Seventy percent of the offenders were aged 17 through 34. Of those for whom race was known, 53 percent were black, 45 percent were white, and the remainder were persons of other races.

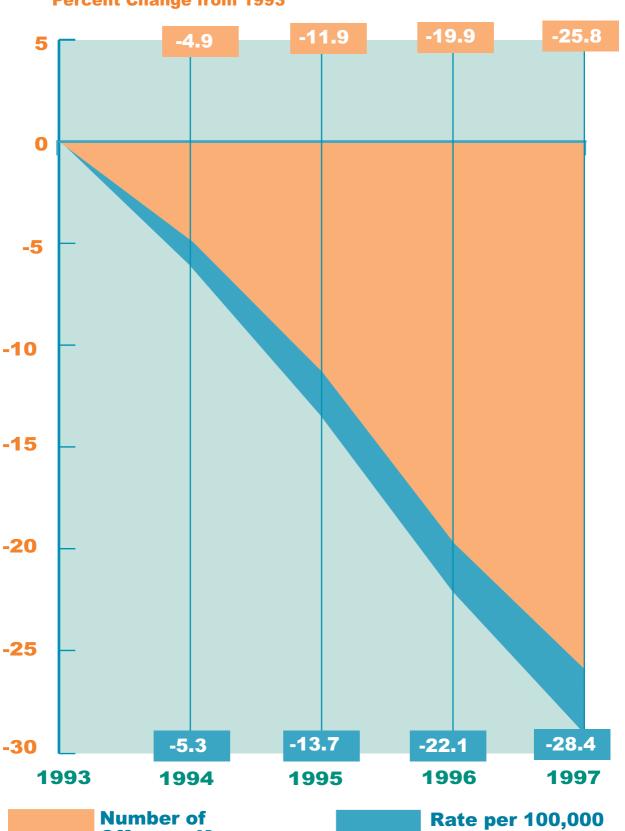

Data indicate that murder among victims and offenders most often is intraracial. In 1997, data based on one victim/one offender incidents show that 94 percent of black murder victims were slain by black offenders and that 85 percent of white murder victims were slain by white offenders.

Correlating the sex of victims to offenders, data indicate that males were most often slain by males. In 88 percent of single victim/single offender incidents, both victim and offender were male. In contrast, data indicate that 9 out of every 10 female victims were murdered by males.

Consistent with previous years' data, the weapon most frequently used in the commission of a murder was a firearm; in 1997, approximately 7 out of every 10 murders in the Nation were committed with a firearm of some type. Of those murders for which weapon data were submitted, handguns accounted for 53 percent of the total. Shotguns and rifles, at 4 percent each, accounted for another 8 percent. Other or unknown types of firearms accounted for an additional 7 percent. Of the remaining

weapon categories, knives or cutting instruments were employed in 13 percent of murders; personal weapons (hands, fists, feet, etc.) in 6 percent; blunt objects (clubs, hammers, etc.) in 5 percent; and other dangerous weapons (poison, explosives, etc.) in the remainder. (See Table 2.10.) A state-by-state breakdown of weapons used in connection with murder is shown in Table 20.

Supplementary data for 1997 indicate that nearly half (48 percent) of all murder victims knew their assailants. Thirteen percent of all murder victims were related to their offenders, and 35 percent were acquainted with them. Fourteen percent of the victims were murdered by strangers. The relationships between victims and offenders were not known for 38 percent of the murders. In 1997, among all female murder victims, 29 percent were slain by husbands or boyfriends. In contrast, 3 percent of the male victims were killed by wives or girlfriends.

Considering circumstances, arguments accounted for 31 percent of the murders during the year. Nineteen percent of murders occurred in conjunction with felonious activities such

as robbery, arson, etc.; while 1 percent was suspected to have been the result of some felonious activity. Table 2.14 shows murder circumstances for the past 5 years, 1993-1997.

Law Enforcement Response

The crime of murder is cleared at a higher rate than is any other Crime Index offense. In 1997, law enforcement agencies across the Nation recorded a 66-percent clearance rate for murder. The most successful clearance rate, 77 percent, was reported in rural counties. The clearance rate for murder in suburban counties was 69 percent and that for the Nation's cities, collectively, was 65 percent. (See Table 25.)

The highest murder clearance rate regionally was registered in the Northeastern States, with 71 percent—followed closely by the Southern States at 70 percent. The Midwestern and Western States each registered a rate of 60 percent.

Measured by clearances, the proportion of juvenile involvement in criminal activity was lower for murder than for any other Index crime. Persons under 18 years of age accounted for 8 percent of the willful killings cleared by both law enforcement nationally and in cities nationwide in 1997. In suburban counties, 6 percent of murder clearances involved persons in this age group; in rural counties juveniles accounted for 5 percent of clearances.

Law enforcement agencies across the country made an estimated 18,290 arrests for murder in 1997. Similar to the 1996 figures, 56 percent of the arrestees in 1997 were under 25 years of age, with the 18- to 24-year-old age group accounting for 42 percent of the total. (See Table 38.)

Ninety percent of persons arrested for murder in 1997 were males, and 10 percent were females. Blacks comprised 56 percent of the total; whites, 42 percent; and other races, the remainder.

In 1997, total arrests for murder decreased by 6 percent when compared to 1996 arrest figures. Arrests of persons aged 18 and over decreased by 4 percent, and those of juveniles decreased by 16 percent. During the same 2-year period, arrests of males for murder were down 5 percent; those for females were down 8 percent.

Long-term trends indicate the 1997 murder arrest total was 25 percent below the 1993 figure and 12 percent below the 1988 figure.

Justifiable Homicide

Certain willful killings are classified as justifiable or excusable, based on the results of law enforcement investigation. In Uniform Crime Reporting, justifiable homicide is defined as and limited to the killing of a felon by a law enforcement officer in the line of duty, or the killing of a felon by a private citizen during the commission of a felony. These offenses are tabulated independently and are not included in murder counts.

In 1997, contributing agencies provided supplemental data for 621 justifiable homicides. Of the 621 justifiable homicides in 1997, 353 involved law enforcement officers and 268 involved private citizens. Data on weapons indicate that firearms were the weapons most frequently used in justifiable homicides (93 percent), with handguns comprising 85 percent of the total firearms used and 79 percent of overall weapons used. (See Tables 2.16 and 2.17.)

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Uniform Crime Reporting Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

1997	96,122	35.9
Percent change	1	-1.1

During 1997, law enforcement agencies nationwide received reports of an estimated 96,122 forcible rapes, representing the fifth consecutive annual decrease. Showing virtually no change from the 1996 level, the 1997 count registered 9 percent below the 1993 level, but was higher than the 1988 count by 4 percent.

The geographic area accounting for the highest percent of the rape total, 40 percent, was the most populous area, the South. The Midwest and the West accounted for 25 percent and 23 percent, respectively, and the Northeast, 13 percent. Two-year trends for forcible rapes indicated a 2-percent decrease in the Midwest and a 1-percent decrease in the Northeast. In contrast, increases of 1 percent were noted in both the South and the West. (See Tables 3 and 4.)

The highest number of forcible rapes occurred in July, while the lowest number was reported during the month of December. (See Table 2.18.)

Table 2.18 — Forcible Rape by Month, 1993-1997 [Percent distribution]

Months	1993	1994	1995	1996	1997
January	7.7	7.5	7.7	7.9	7.9
February	6.9	7.3	7.1	7.9	7.0
March	8.5	8.3	8.5	8.1	8.0
April	8.2	8.4	8.0	8.1	8.3
May	8.9	8.9	8.9	9.0	9.1
June	9.2	9.2	8.5	8.8	9.5
July	9.7	9.7	9.4	9.5	9.7
August	9.3	9.6	9.9	9.1	9.4
September	8.3	8.7	8.8	8.8	8.8
October	8.1	8.5	8.7	8.5	8.3
November	7.5	7.3	7.8	7.4	7.4
December	7.7	6.5	6.9	6.9	6.6

Rate

The victims of rape are always female by the Uniform Crime Reporting definition. An estimated 70 of every 100,000 females in the country were reported rape victims in 1997. Compared to the 1996 rate, the 1997 rate for forcible rape of females decreased 1 percent; and compared to the 1993 rate, the decline was 13 percent.

The highest rate for forcible rape in 1997—74 victims per 100,000 females—was recorded in the Nation's metropolitan areas. A rate of 70 per 100,000 females was recorded outside metropolitan areas, and a rate of 48 per 100,000 females in rural counties. Although the metropolitan areas record the highest rate for rape, only metropolitan areas have experienced a rate decline over the past 10 years (1988-1997), 11 percent. Cities outside metropolitan areas and rural counties experienced increases, 43 and 33 percent respectively, for this same 10-year timeframe.

Regionally, the Southern States recorded the highest rate for forcible rape, 79 victims per 100,000 females. Following were the Midwestern States with a rate of 74; the Western States, 72; and the Northeastern States, 48. Compared to 1996 rates, the Northeast registered a 2-percent decline; the Midwest and the West a 1-percent decline each. Rates for forcible rape for the South remained unchanged.

Three of the four regions recorded decreases in female forcible rape over the last 10 years. The largest decline, 16 percent, was reported by the Northeast. The West showed an 11-percent decrease. The smallest decrease, 1 percent, was recorded in the Midwest. A 1-percent increase was shown in the Southern States for the same timeframe.

Nature

The highest percentage of rapes committed are those by force which accounted for 88 percent of rapes reported in 1997. Attempts or assaults to commit forcible rape accounted for the remaining 12 percent. When compared to the 1996 volume, the number of rapes by force in 1997 showed virtually no change; a 5-percent decrease in attempts to rape was noted.

Complaints of all Crime Index offenses made to law enforcement agencies which are found to be false or baseless can be "unfounded" and excluded from crime counts. A higher percentage of complaints of forcible rape are determined "unfounded," or found by investigation to be false, than for any other Index crime. While the average of "unfounded" rates for all Crime Index offenses was 2 percent in 1997, 8 percent of forcible rape complaints were "unfounded" for the same timeframe.

Law Enforcement Response

Nationally, over half of the forcible rapes reported to law enforcement were cleared by arrest or exceptional means during 1997. At 55 percent for suburban counties and 52 percent for rural counties, county law enforcement clearance rates were slightly higher than the city law enforcement clearance rate at 50 percent. (See Table 25.)

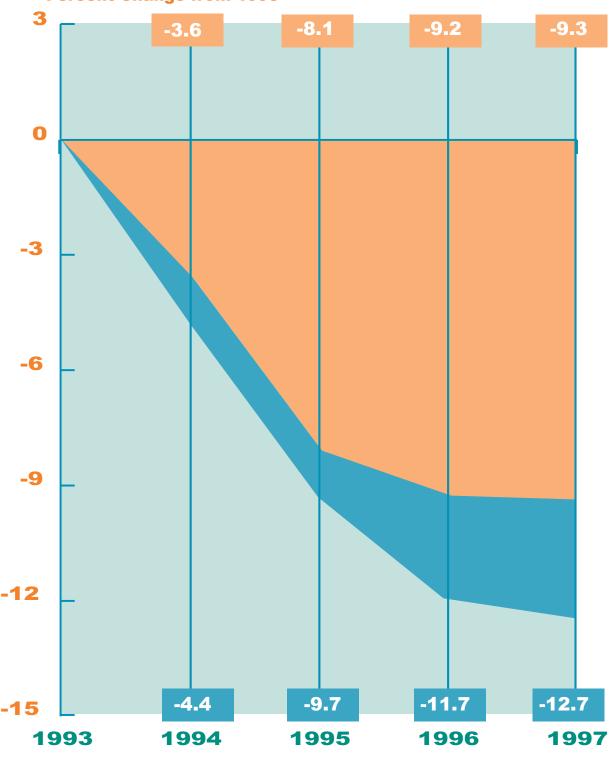

In 1997, by geographic region, forcible rape clearance rates were 56 percent in the South, 50 percent in the Northeast, 48 percent in the Midwest, and 45 percent in the West. (See Table 26.)

Eleven percent of the total clearances for forcible rape in the country as a whole involved only juveniles (persons under 18 years of age). The percentage of juvenile involvement varied by community type, ranging from 11 percent in the Nation's cities to 13 percent in rural counties. Cities with populations under 10,000 experienced the greatest juvenile involvement, 15 percent. (See Table 28.)

In 1997, an estimated 32,060 arrests for forcible rape were made by participating law enforcement agencies throughout the Nation. Forty-four percent of the forcible rape arrestees were under age 25, and 58 percent of those arrested were white. (See Tables 29, 41, and 43.)

Compared to the national arrest total for forcible rape in 1996, a 4-percent decrease was registered in 1997. Arrests in the Nation's cities declined by 6 percent, and arrests in suburban counties declined by 3 percent. In contrast, a 4-percent increase in arrests for forcible rape was recorded in rural counties. (See Tables 36, 44, 50, and 56.)

Forcible Rape Percent Change from 1993

ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

	- TREND -	
Year	Number of offenses	Rate per 100,000 inhabitants
1996	535,594	201.9
1997	497,950	186.1
Percent change	-7.0	-7.8

In 1997, the estimated national robbery total, 497,950, was the lowest since 1985. The robbery volume for 1997 declined 7 percent from the 1996 national total and registered an 8-percent decrease in the Nation's cities. Cities with populations of 500,000 to 999,999 inhabitants reported the largest decline—12 percent. During the same period, the robbery volume dropped 6 percent in suburban counties. However, the robbery volume increased by 11 percent in rural counties. (See Table 12.)

Thirty-six percent of reported robberies were accounted for by the Southern Region, the most populous area of the Nation. Following were the Western Region with 23 percent, the Northeastern Region with 21 percent, and the Midwestern Region with 20 percent. (See Table 3.) All of the Nation's regions reported a decrease in the number of robberies in 1997 as compared to 1996 figures. The Northeast and West marked 11- and 10-percent decreases, respectively, while the South recorded a 5-percent decline, and the Midwest a 2-percent drop.

For the years 1993-1997, the national trend in the robbery volume, as well as the robbery rate, is presented in Chart 2.8. Long-term national trends show robbery offenses down 25 percent from the 1993 level and down 8 percent compared to the 1988 volume.

The 1997 monthly volume figures show robberies occurred most frequently in January and least often in February and April.

Table 2.19 — Robbery by Month, 1993-1997 [Percent distribution]

Months	1993	1994	1995	1996	1997
January	8.9	8.6	8.6	9.2	9.2
February	7.2	7.7	7.3	8.0	7.6
March	8.2	8.6	8.0	8.1	7.9
April	7.5	8.0	7.5	7.5	7.6
May	7.6	8.0	7.8	7.9	8.3
June	8.0	8.0	8.0	7.9	8.0
July	8.8	8.5	8.5	8.5	8.6
August	8.9	8.8	8.9	8.6	8.8
September	8.5	8.3	8.5	8.2	8.5
October	9.0	8.7	9.3	8.6	8.7
November	8.5	8.1	8.7	8.4	8.3
December	9.0	8.8	8.9	9.1	8.5

Rate

In 1997, there were 186 robberies for every 100,000 people nationwide, 8 percent lower than in 1996. The rate in metropolitan areas was 223 per 100,000 inhabitants; in

cities outside metropolitan areas, 72; and in rural areas, 18. With 578 robberies per 100,000 inhabitants, the highest rate was recorded in cities with populations of 1 million and over. (See Table 16.)

Regionally, the robbery rate was 193 per 100,000 population in the West, 203 in the Northeast, 192 in the South, and 157 in the Midwest. Compared to 1996 rates, 1997 robbery rates were down in all regions. The West marked a 12-percent decrease; the Northeast, a decline of 11 percent; the South, a 6-percent decrease; and the Midwest, a 3-percent decline. (See Table 4.)

Nature

Losses estimated at nearly \$500 million were attributed to robberies in 1997. The average dollar loss per robbery was \$995, up from \$921 in 1996. In 1997, the average dollar loss ranged from \$576 taken during robberies of convenience stores to \$4,802 per bank robbery. (See Table 23.) Monetary loss alone cannot measure the impact of this violent crime on its victims. Although the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

Street and highway robberies accounted for half of the offenses in this category during 1997. Robberies of commercial and financial establishments accounted for 24 percent, and those occurring at residences, 12 percent. The remainder were miscellaneous types. Compared to the 1996 totals, all robbery types declined in 1997. Decreases ranged from 13 percent for those committed on streets and highways to 5 percent for commercial house, convenience store, and residential robberies. (See Table 23.)

Table 2.20 — Robbery, Percent Distribution, 1997
[By region]

	United States Total	North- eastern States	Mid- western States	Southern States	Western States

¹Because of rounding, percentages may not add to total.

In 1997, firearms were the weapons used in 40 percent of all robberies. Strong-arm tactics were used in 38 percent, knives or cutting instruments in 9 percent, and other dangerous weapons were involved in the remaining 13 percent. All four weapon-used categories for robbery decreased from the previous year's totals. Decreases were as follows: knives or cutting instruments, 12 percent; firearms, 8 percent; other dangerous weapons, 7 percent; and strong-arm tactics, 5 percent. A state-by-state breakdown of weapons used in robberies in 1997 is shown in Table 21.

Law Enforcement Response

During 1997, law enforcement agencies nationwide recorded a 26-percent robbery clearance rate. Rural county law enforcement agencies registered the highest robbery clearance rate of 42 percent; law enforcement agencies in suburban counties

Table 2.22 — Robbery, Types of Weapons Used, 1997 [Percent distribution by region]

			Armed		
Region	Total all weapons ¹	Firearms	Knives or cutting instru- ments	Other weapons	Strong- arm
Total	100.0	39.7	8.5	13.4	38.4
Northeastern States	100.0 100.0 100.0 100.0	26.0 42.2 47.0 37.5	10.3 7.9 7.2 9.7	27.6 11.7 9.6 8.9	36.2 38.2 36.2 43.8

¹ Because of rounding, percentages may not add to total.

recorded a 30-percent clearance rate. In the Nation's cities collectively, the robbery clearance rate was 26 percent, with law enforcement agencies in cities under 10,000 in population having the highest clearance rate, 36 percent. (See Table 25.)

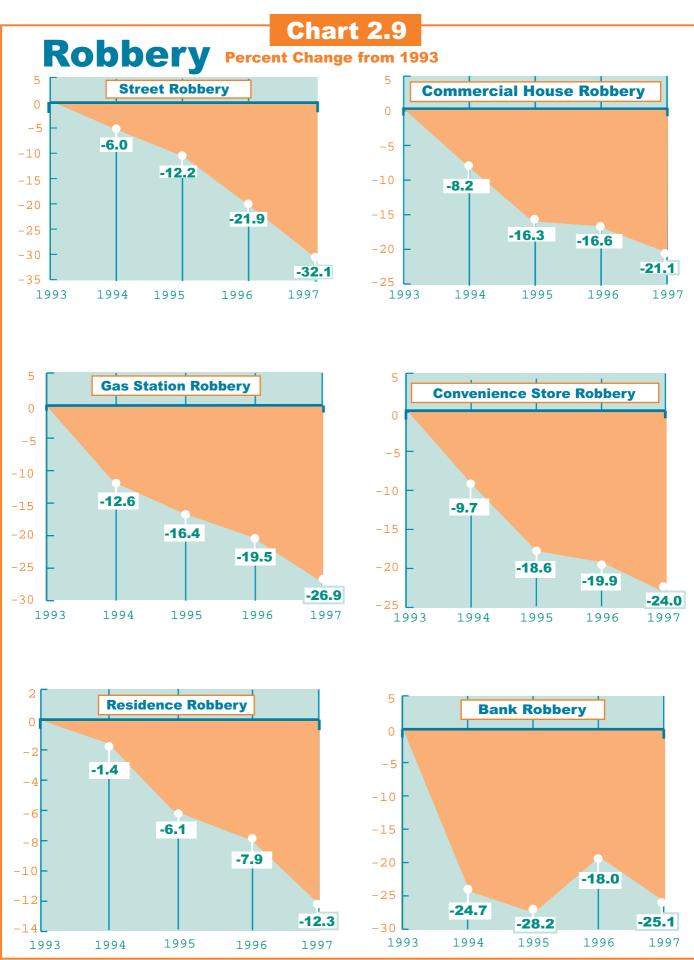

Regional robbery clearance percentages were 29 percent in the South, 26 percent in the West, 24 percent in the Northeast, and 23 percent in the Midwest. (See Table 26.)

Seventeen percent of all robbery clearances in 1997 involved offenders under the age of 18. This age group accounted for 18 percent of the robbery clearances in suburban counties, 17 percent of those in the Nation's cities, and 12 percent of those in rural counties. (See Table 28.)

Arrests for robbery were down 4 percent in 1997 from the 1996 total. During this 2-year period, arrests of juveniles were down 8 percent, and arrests of adults decreased 3 percent. Following the national trend, the number of robbery arrests dropped 7 percent in the Nation's rural counties and 5 percent in the Nation's cities. Suburban counties recorded a 1-percent decline.

Arrests for robbery were down 12 percent in 1997 from the 1993 total. During this 5-year period, arrests of males for robbery were down 13 percent, while arrests of females were down 2 percent. For the same timespan, arrests of persons 18 years of age and older decreased 15 percent, and juvenile arrests fell 2 percent.

In 1997, 65 percent of all robbery arrestees were under 25 years of age, and 90 percent were males. Blacks accounted for 57 percent of the total robbery arrests, whites for 41 percent, and all other races for the remainder.

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND —	Rate per 100,000
Number of offenses	inhabitants
1,037,049	390.9
1,022,492	382.0
-1.4	-2.3
	Number of offenses 1,037,049 1,022,492

In 1997, aggravated assaults decreased for the fourth consecutive year. The estimated total of 1,022,492 aggravated assaults represented a 1-percent decline for this offense and accounted for 63 percent of the violent crimes in 1997.

The number of reported aggravated assaults decreased in all of the Nation's regions. The Southern Region, the Nation's most populous area according to geographic distribution figures, accounted for 41 percent of the aggravated assault volume. Following were the Western Region with 24 percent, the Midwestern Region with 20 percent, and the Northeastern Region with 15 percent. (See Tables 3 and 4.)

July's monthly figures represented the highest volume of aggravated assaults in 1997, while the lowest number occurred during February.

Table 2.23 — Aggravated Assault by Month, 1993-1997 [Percent distribution]

Months	1993	1994	1995	1996	1997
January	7.6	7.2	7.6	7.8	7.5
February	6.6	6.9	7.0	7.4	7.0
March	8.1	8.2	8.1	8.0	8.3
April	8.5	8.5	8.3	8.1	8.2
May	9.1	8.7	8.8	8.9	9.3
June	9.1	8.9	8.8	9.1	9.1
July	9.7	9.4	9.4	9.4	9.5
August	9.3	9.3	9.4	9.3	9.4
September	8.5	8.8	8.9	8.6	8.7
October	8.6	8.7	8.7	8.5	8.3
November	7.5	7.6	7.5	7.4	7.5
December	7.3	7.7	7.4	7.6	7.2

The aggravated assault volume decreased 2 percent in the Nation's cities collectively from 1996 to 1997. Among city population groupings, decreases ranged from 4 percent in cities with populations of 10,000 to 24,999 to 1 percent in cities with 500,000 to 999,999 inhabitants. The number of aggravated assaults also decreased 1 percent in suburban counties. During the same 2-year period, aggravated assaults increased by 1 percent in cities with populations under 10,000 and 2 percent in rural counties. (See Table 12.)

The 5- and 10-year trends for the country as a whole show aggravated assault figures for 1997 were 10 percent lower than in 1993 and 12 percent above those in 1988. (See Table 1.)

Rate

For every 100,000 people nationwide, there were 382 reported victims of aggravated assault in 1997. The rate was 2

percent lower than in 1996 and 13 percent below the 1993 rate. The 1997 rate was, however, 3 percent higher than the 1988 rate.

The rate in metropolitan areas at 416 per 100,000 inhabitants was higher than the national average in 1997. A rate of 343 was experienced by cities outside metropolitan areas and a rate of 183 was recorded in rural counties.

Compared to 1996 rates, 1997 aggravated assault rates were down in all regions. The aggravated assault rate was 441 per 100,000 people in the South, 415 in the West, 326 in the Midwest, and 304 in the Northeast. The South and West both decreased by 3 percent, the Midwest registered a 2-percent drop, and the Northeast marked a 1-percent decline. (See Table 4.)

Nature

Thirty-five percent of the aggravated assaults involved blunt objects or other dangerous weapons in 1997. Twenty-seven percent of the assaults were committed with personal weapons such as hands, fists, and feet; 20 percent with firearms; and 18 percent with knives or cutting instruments.

Comparing 1997 to 1996, aggravated assaults decreased in three of four weapon categories. Aggravated assaults with firearms fell by 9 percent; knives and other cutting instruments, 2 percent; and blunt instruments or other dangerous weapons, 1 percent. Aggravated assaults with personal weapons (hands, fists, feet, etc.) increased 4 percent from the previous year's numbers. State-by-state totals for weapons used in assaults during 1997 are shown in Table 22.

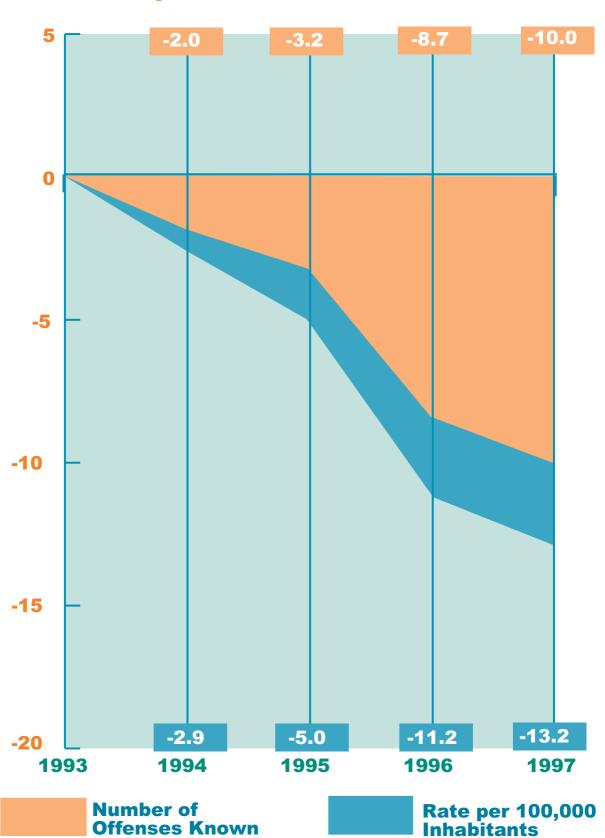

Table 2.24 — Aggravated Assault, Types of Weapons Used, 1997 [Percent distribution by region]

Region	Total all weapons ¹	Firearms	Knives or cutting instru- ments	Other weapons (clubs, blunt objects, etc.)	Personal weapons
Total	100.0	20.0	17.9	35.3	26.7

¹ Because of rounding, percentages may not add to total.

Aggravated Assault

Percent Change from 1993

Law Enforcement Response

Law enforcement agencies across the country reported a 58-percent aggravated assault clearance rate in 1997. Rural and suburban county law enforcement agencies cleared 65 and 63 percent, respectively, while cities collectively recorded 57 percent cleared. Cities with populations under 10,000 recorded the highest aggravated assault clearance rate among the city groupings at 67 percent.

The South and West both experienced a regional clearance rate of 60 percent for aggravated assault; in the Northeast, 55 percent; and, in the Midwest, 54 percent.

Persons under age 18 were identified as the assailants in 12 percent of the aggravated assault clearances reported nationally, in cities, and in suburban counties. Ten percent of the clearances reported in rural counties involved persons in this age group.

Arrests for aggravated assaults represented 74 percent of violent crime arrests in 1997. Of the estimated 534,920 individuals arrested for this offense, 61 percent were white, 37 percent were black, and 2 percent were comprised of all other races. Eighty-six percent of the arrestees were adults; 81 percent were males.

In 1997, arrests for aggravated assaults were up 1 percent from the 1996 total. Arrests of adults were also up 1 percent, while arrests of persons under age 18 decreased 2 percent during this 2-year period. Comparing the 1993 and 1997 figures, the 5-year trend shows an increase of 3 percent for total arrests and 5 percent for adults. Aggravated assault arrests of juveniles declined 5 percent.

PROPERTY CRIME TOTAL

DEFINITION

Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. Arson is included since it involves the destruction of property; its victims may be subjected to force.

Year	Number of offenses ¹	Rate per 100,000 inhabitants ¹
1996	11,805,323	4,450.1
1997	11,540,297	4,311.9
Percent change	-2.2	-3.1

The Nation experienced an estimated 11.5 million property crime offenses in 1997, approximately 265,000 fewer than in 1996, representing a decline of 2 percent. Five- and 10-year trends show the 1997 volume was 6 percent lower than the 1993 level and 7 percent lower than in 1988.

In 1997, the most populous region in the country, the South, accounted for 40 percent of all reported property crimes. The Western States followed with 24 percent, the Midwestern States with 22 percent, and the Northeastern States with 14 percent.

All four regions experienced decreases in the number of property crimes reported from 1996 to 1997. A decline of 5 percent was registered in the Northeast, a 2-percent drop was noted in both the South and West, and a 1-percent decrease was recorded in the Midwest. (See Table 4.)

From 1996 to 1997, property crime decreased in the Nation's cities collectively by 3 percent, with the greatest drop, 6 percent, in cities with populations of 250,000 to 999,999. Suburban counties experienced a 3-percent decline, while an increase of 1 percent was recorded by rural county law enforcement agencies. (See Table 12.)

A comparison of 1997 property crimes by month indicates that the largest number occurred in July, while the smallest number occurred in February.

Table 2.25 — Property Crime Total by Month, 1993-1997 [Percent distribution]

[
Months	1993	1994	1995	1996	1997
January	8.1	7.6	8.1	8.0	8.2
February	7.0	7.0	7.2	7.6	7.3
March	8.1	8.2	8.2	7.9	8.0
April	8.0	8.0	7.8	8.0	8.0
May	8.2	8.4	8.4	8.5	8.4
June	8.6	8.5	8.5	8.4	8.5
July	9.1	9.1	9.0	9.2	9.1
August	9.2	9.3	9.3	9.1	9.0
September	8.5	8.5	8.5	8.4	8.5
October	8.6	8.7	8.8	8.7	8.7
November	8.1	8.2	8.2	7.9	8.0
December	8.4	8.5	8.1	8.3	8.3

Rate

The 1997 property crime rate—an estimated 4,312 property crimes per 100,000 inhabitants—was 3 percent lower than the 1996 rate. The 1997 rate fell below the 1993 rate by 9 percent and below the 1988 rate by 14 percent.

In comparing geographic distribution of property crime rates in 1997 to those in 1996, all 4 regions experienced decreases. The greatest decline, 5 percent, was recorded in the Northeast which experienced a rate of 3,197 per 100,000

inhabitants. The South and the West reported rates of 4,865 and 4,683, respectively, representing declines of 3 percent each. The Midwest, with a rate of 4,046 per 100,000 population, experienced a decline of 2 percent.

In 1997, the property crime rates were 4,752 per 100,000 inhabitants in cities outside metropolitan areas; 4,641 in metropolitan areas; and 1,833 in rural counties. By population group, cities with populations from 250,000 to 499,999 recorded the highest property crime rate—7,481 per 100,000 inhabitants. (See Tables 2 and 16.)

Nature

In connection with all property crimes, over \$15 billion was estimated as the dollar value of property stolen in 1997. Slightly higher than the \$1,266 recorded as the average loss for 1996, the average loss per offense in 1997 was \$1,311.

Larceny-theft, comprising 67 percent, accounted for the highest percent of all property crimes in 1997. Burglary accounted for 21 percent, while motor vehicle theft accounted for the remaining 12 percent. Detailed arson data were provided for 69,269 arson offenses by 11,461 law enforcement agencies in 1997. The average dollar loss of property damaged due to reported arsons was \$11,294.

Law Enforcement Response

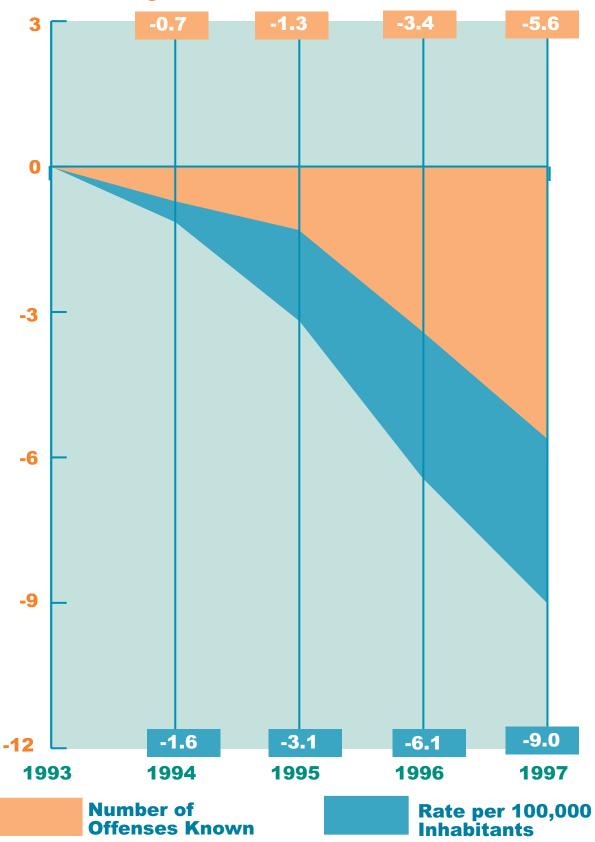

The clearance rate for property crimes is generally lower than for violent crimes. Compared to a 48-percent clearance rate for violent crime in 1997, the overall property crime clearance rate was 18 percent. Property crime clearance rates ranged from 19 percent in the South to 16 percent in the West. (See Table 26.)

Twenty-three percent of the property crimes cleared nationwide by law enforcement involved only juveniles (persons under age 18). The proportion of juvenile clearances was 23 percent in cities, 22 percent in suburban counties, and 19 percent in rural counties. (See Table 28.)

The estimated 2,015,600 arrests for property crimes comprised 13 percent of the overall total arrests in 1997. When compared over 2-, 5-, and 10-year periods, 1997 arrest totals for property crime were 4 percent lower than the 1996 total, 7 percent lower than the 1993 figure, and 8 percent below the 1988 figure. Nationwide, juvenile arrests decreased by 6 percent compared to 1996 totals, and adult arrests for property crimes declined 2 percent. (See Tables 32, 34, and 36.)

Males comprised 71 percent of the total arrestees for property crime in 1997. Sixty-five percent of the arrestees were white, and 65 percent were adults.

Property Crime Percent Change from 1993

BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

Year	Number of offenses	Rate per 100,000 inhabitants
1996	2,506,400	944.8
1997	2,461,120	919.6
Percent change	-1.8	-2.7

Marking the sixth consecutive annual decline in volume, burglaries were estimated at 2,461,120 nationwide in 1997. Regional distribution figures indicated that the highest burglary volume, 42 percent, occurred in the most populous Southern States in 1997. Twenty-four percent of burglaries were reported in the Western States, 20 percent in the Midwestern States, and 14 percent in the Northeastern States. (See Table 3.)

Monthly figures for 1997 indicate that the greatest number of burglaries were recorded in July, while the lowest volume occurred during February. (See Table 2.26.)

Table 2.26 — Burglary by Month, 1993-1997 [Percent distribution]

Months	1993	1994	1995	1996	1997
January	8.4	7.9	8.4	8.3	8.4
February	7.0	7.1	7.2	7.6	7.2
March	8.2	8.2	8.2	7.8	7.8
April	7.8	7.9	7.7	7.8	7.8
May	8.1	8.4	8.4	8.3	8.3
June	8.5	8.3	8.3	8.1	8.2
July	9.1	9.1	9.0	9.1	9.1
August	9.2	9.3	9.2	8.9	9.0
September	8.7	8.6	8.5	8.6	8.7
October	8.5	8.5	8.8	8.8	8.8
November	8.2	8.3	8.3	8.0	8.2
December	8.4	8.5	8.1	8.6	8.5
	1	1	1	1	1

In 1997, the national burglary volume dropped 2 percent compared to the 1996 total. By population group, a 3-percent decline was experienced by the Nation's cities overall; cities with populations of over 1 million showed the largest decrease—7 percent. A 1-percent decline was recorded in suburban counties, while rural counties experienced a 1-percent increase. (See Table 12.)

Compared to the previous year's burglary volumes, all four regions of the United States reported decreases in 1997. The Northeastern States declined 7 percent; the Midwestern and Southern States, 1 percent each. Burglary volumes decreased by less than 1 percent in the Western States. (See Table 4.)

National 5- and 10-year trends indicate burglary was down 13 percent from the 1993 level and down 24 percent compared to the 1988 volume.

Rate

Nationwide, the 1997 burglary rate was the lowest in more than two decades, at 920 offenses per 100,000 inhabitants. Comparatively, the rate was 3 percent below the 1996 figure, 16 percent under the 1993 level, and 30 percent lower than the 1988 rate. In the metropolitan areas, the burglary rate for every 100,000 in population was 963 offenses; in the cities outside metropolitan areas, 932; and in the rural counties, 622.

Geographically, the burglary rate was 1,102 offenses per 100,000 population in the Nation's Southern States, 986 in the Western States, 804 in the Midwestern States, and 651 in the Northeastern States. Rate comparisons of 1996 and 1997 indicate a 7-percent decline in the Northeast. The Midwestern, Southern, and Western Regions each experienced a 2-percent decline. (See Table 4.)

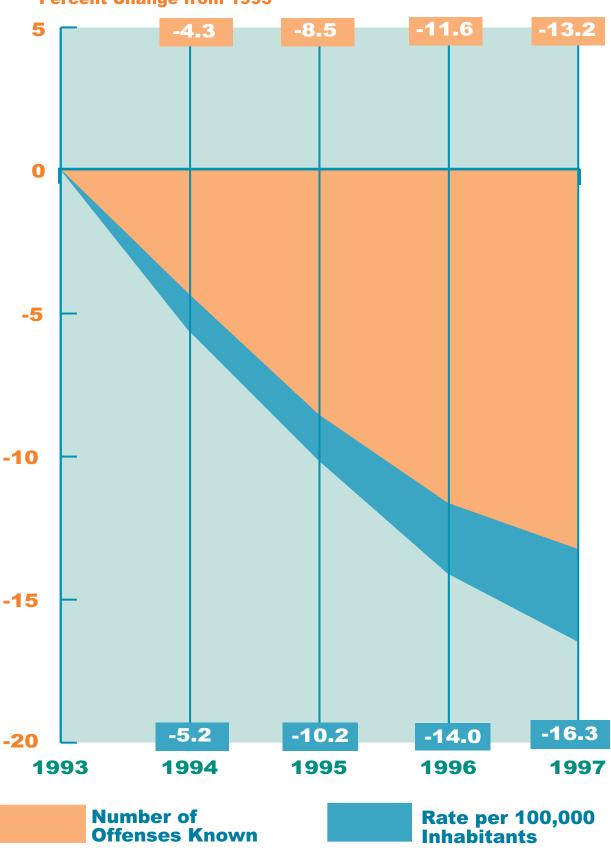

Nature

Sixty-six percent of all burglaries involved forcible entry, 27 percent were unlawful entries (without force), and the remainder were forcible entry attempts in 1997. Offenses for which time of occurrence was reported showed that 52 percent of burglaries happened during daytime hours and 48 percent at night. Two of every 3 burglaries in 1997 were residential in nature. Sixty percent of residential burglaries occurred during the daytime, while 65 percent of nonresidential burglaries occurred during the nighttime.

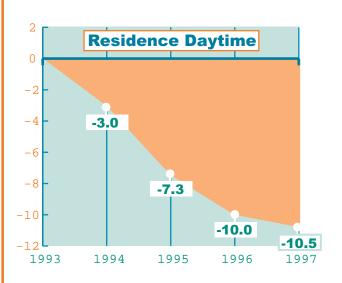

Burglary victims experienced estimated losses of \$3.3 billion in 1997. Overall, the average dollar loss per burglary was \$1,334; for residential offenses, \$1,305; and for nonresidential offenses, \$1,391. The 1997 average loss for residential burglary decreased from the previous year's figures, and the average loss for nonresidential property increased.

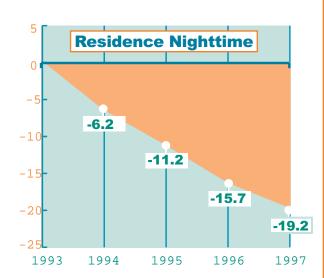

Two-percent declines were observed in both residential and nonresidential burglary volumes from 1996 to 1997. (See Table 23.)

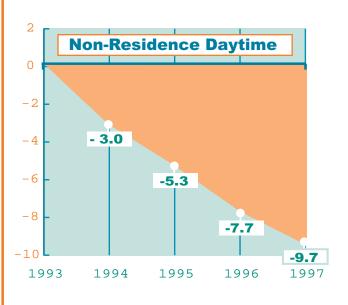

Burglary Percent Change from 1993

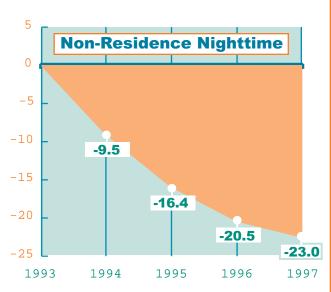

BurglaryPercent Change from 1993

Law Enforcement Response

For burglaries brought to the attention of law enforcement agencies throughout the country, a 14-percent clearance rate was recorded in 1997. The Northeast and the South each had regional clearance rates of 15 percent; the Midwest and the West each reported clearance rates of 12 percent. (See Table 26.)

By population group, rural county law enforcement agencies cleared 17 percent of the burglaries reported in their jurisdictions. Agencies in suburban counties and in cities cleared 15 and 13 percent, respectively. (See Table 25.)

Eighty percent of all burglary offenses cleared involved adults; the remaining 20 percent involved juveniles (people under 18 years of age). The Nation's smallest cities (under 10,000 in population) recorded the highest degree of juvenile involvement with juvenile clearances at 26 percent. Juveniles accounted for 22 percent of the burglary clearances

in suburban counties, and 20 percent of the clearances in both cities and rural counties. (See Table 28.)

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary for which an estimated 356,000 arrests were made in 1997.

Total burglary arrests were down 4 percent from 1996 to 1997. Arrests of adults and juveniles declined 3 and 6 percent respectively. For the same 2-year time period, the Nation's cities collectively showed a 4-percent decrease in total burglary arrests. Rural counties experienced a 5-percent decline in burglary arrests, and suburban counties reported a 3-percent decrease.

In 1997, males accounted for 88 percent of burglary arrestees, and persons under 25 years of age comprised 65 percent of the total. Racially, whites accounted for 68 percent of all persons arrested for burglary, blacks for 30 percent, and other races for the remainder.

LARCENY-THEFT

DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, confidence games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

TREND -	
Number of offenses	Rate per 100,000 inhabitants
7,904,685	2,979.7
7,725,470	2,886.5
-2.3	-3.1
	Number of offenses 7,904,685 7,725,470

Comprising 59 percent of the 1997 Crime Index total, larceny-theft was estimated at over 7.7 million offenses and accounted for 67 percent of the property crime total. Similar to previous years' occurrences, larceny-thefts occurred most often in July and least often in February.

Table 2.27 — Larceny-theft by Month, 1993-1997 [Percent distribution]

Months	1993	1994	1995	1996	1997
January	7.8	7.3	7.9	7.8	8.0
February	6.9	7.0	7.1	7.5	7.3
March	8.1	8.1	8.1	7.9	8.0
April	8.0	8.0	7.8	8.0	8.0
May	8.3	8.4	8.5	8.6	8.5
June	8.7	8.6	8.6	8.6	8.6
July	9.2	9.1	9.1	9.3	9.2
August	9.3	9.4	9.4	9.2	9.1
September	8.5	8.5	8.5	8.4	8.5
October	8.6	8.8	8.8	8.8	8.7
November	8.1	8.2	8.1	7.8	7.9
December	8.3	8.5	8.1	8.1	8.2

The Southern States, the most populous region, accounted for 40 percent of all larceny-thefts reported; the Midwestern and Western States, reported 23 percent each, and the Northeastern States recorded 14 percent. (See Table 3.)

Compared to the 1996 figure, the volume of larceny-thefts nationwide declined by 2 percent in 1997. In considering larceny-theft by community type, both cities collectively and suburban communities recorded decreases of 3 percent, while rural counties experienced virtually no change. (See Table 12.)

All four geographic regions of the country experienced a decrease in incidents of larceny-theft; 3 percent in both the Northeast and West and 2 percent in both the Midwest and South. (See Table 4.)

Comparing the 1997 larceny-theft total to 1993 figures, the long-term national trend indicates a decline of 1 percent. When compared to the 1988 level, however, there was virtually no change. (See Table 1.)

Rate

The 1997 larceny-theft rate of 2,887 per 100,000 population revealed a 3-percent decline from the 1996 rate. Five- and 10-year trends showed the rate was 5 percent lower than in 1993 and 8 percent below 1988 levels. Metropolitan areas recorded a rate of 3,087 per 100,000 inhabitants; cities outside metropolitan areas reported a rate of 3,586 per 100,000 population; and rural counties registered a rate of 1,082. (See Tables 1 and 2.)

The 1997 larceny-theft rate per 100,000 inhabitants declined across all regions of the Nation. The West recorded a 4-percent decline. The Northeast and South each

reported declines of 3 percent and the Midwest a decrease of 2 percent. Regionally, the rates included: 3,259 per 100,000 population in the South, 3,042 in the West, 2,806 in the Midwest, and 2,126 per 100,000 inhabitants in the Northeast. (See Table 4.)

Nature

The average value of property stolen in 1997 due to larceny-theft was \$585, up from \$547 in 1996. Applying the average value to the estimated number of larceny-thefts nationally, the loss to victims was over \$4.5 billion for the year. Since many offenses in the larceny category never come to law enforcement attention, particularly if the value of the stolen goods is small, this estimated dollar loss is considered conservative. Seventy-seven percent of reported larceny-thefts were accounted for by losses under \$50 and over \$200, collectively. The remaining 23 percent involved losses ranging from \$50 to \$200.

Losses of goods and property reported stolen as a result of pocket-picking averaged \$466; purse-snatching, \$403; and shoplifting, \$130. Thefts from buildings resulted in an average loss of \$963; from motor vehicles, \$584; and from coin-operated machines, \$453. The average value loss due to thefts of motor vehicle accessories was \$390 and for thefts of bicycles, \$293. (See Table 23.)

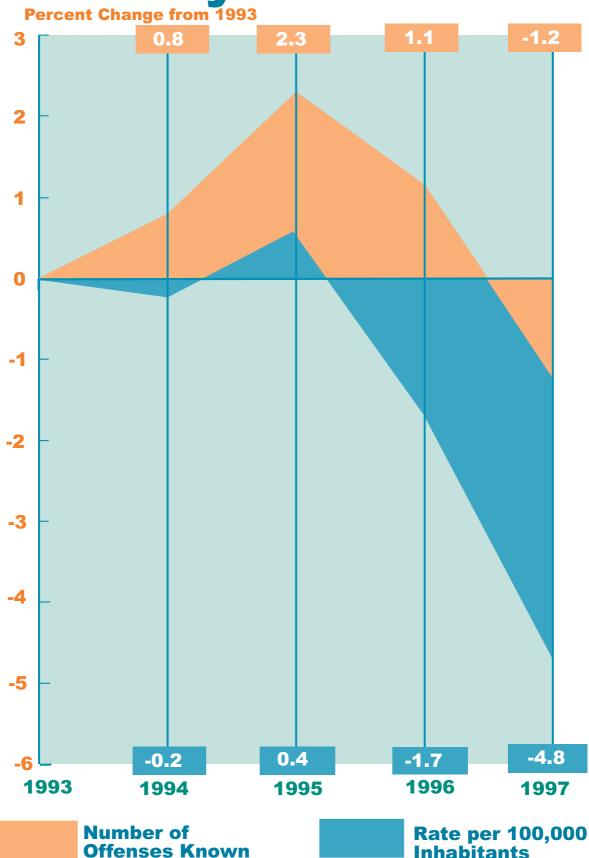

The largest portion of larceny-theft, 36 percent, involved thefts of motor vehicle parts, accessories, and contents. Shop-lifting accounted for 15 percent; thefts from buildings, 14 percent; and thefts of bicycles, 6 percent. Pocket-picking, purse-snatching, thefts from coin-operated machines, and all other types of larceny-thefts comprised the remainder. The distribution of larceny-theft by type and geographic region is shown in Table 2.28.

Law Enforcement Response

In 1997, law enforcement in the Nation's cities reported a 20-percent clearance rate for larceny-theft offenses, the same rate as the Nation overall. Rural and suburban counties recorded a 19-percent clearance rate. The highest rate—25 percent—was seen in cities with populations from 10,000 to 24,999.

By geographic region, law enforcement agencies in the Northeast cleared 21 percent of larceny-thefts in 1997; in the South, 20 percent; and in the Midwest and West, 19 percent each. (See Table 26.)

Juveniles (persons under 18 years of age) were involved in 24 percent of the larceny-theft clearances nationally and in the Nation's cities. Persons in this age group accounted for 22 percent of clearances in suburban counties and 19 percent in rural counties.

Comparing the 1997 total number of persons arrested for larceny-theft to the total in 1996, a decline of 3 percent is shown. Arrests of males declined 4 percent, and those of females decreased 1 percent. Arrests of juveniles declined 4

percent during this same period, and arrests of adults fell 2 percent.

A 3-percent decline in larceny-theft arrests is noted when considering the 5-year period, 1993-1997. Although the number of adult arrests dropped 7 percent during the timespan, arrests of persons under the age of 18 increased 4 percent. Arrests of males declined 6 percent, while arrests of females increased 2 percent.

Larceny-theft accounted for the greatest segment of Crime Index offenses reported to law enforcement in 1997. In addition, larceny-theft accounted for 73 percent of all arrests for property crimes in 1997 and 54 percent of total arrests for all Index crimes. Forty-seven percent of the larceny arrests were of persons under 21 years of age, and 34 percent of the arrestees were under 18. Comprising 35 percent of all larceny-theft arrestees, females were arrested for this offense more often than for any other in 1997.

Considering the total larceny-theft arrestees by race, 65 percent were white, 32 percent were black, and the remaining 3 percent were all other races.

MOTOR VEHICLE THEFT

DEFINITION

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

Year	Number of offenses	Rate per 100,000 inhabitants
1996	1,394,238	525.6
1997	1,353,707	505.8
Percent change	-2.9	-3.8

Nationwide, there were nearly 1.4 million thefts of motor vehicles during 1997, marking the lowest total for that offense since 1987. The distribution of motor vehicle thefts regionally in 1997 showed the Southern States with 35 percent of the volume, the Western States with 29 percent, the Midwestern States with 20 percent, and the Northeastern States with 16 percent. (See Table 3.)

In 1997, monthly volume figures of motor vehicle thefts showed that vehicles were most frequently stolen during January and were least often stolen in February. (See Table 2.29.)

Table 2.29 — Motor Vehicle Theft by Month, 1993-1997 [Percent distribution]

Months	1993	1994	1995	1996	1997
January	8.5	8.1	8.6	8.8	9.0
February	7.4	7.4	7.5	8.0	7.6
March	8.2	8.5	8.2	8.2	8.2
April	7.9	7.9	7.8	7.9	7.9
May	7.9	8.2	8.2	8.1	8.3
June	8.4	8.3	8.1	8.0	8.1
July	8.9	8.9	8.6	8.8	8.7
August	8.9	9.0	9.0	8.6	8.7
September	8.5	8.4	8.4	8.2	8.3
October	8.7	8.7	8.9	8.6	8.6
November	8.3	8.3	8.5	8.3	8.3
December	8.4	8.3	8.3	8.6	8.3

From 1996 to 1997, motor vehicle thefts declined 3 percent in the Nation and 5 percent in cities. The decreases among city population groupings ranged from 8 percent in cities 500,000 to 999,999 in population to virtually no change in cities with populations under 10,000. During the same 2-year period, the volume of motor vehicle thefts which occurred in suburban counties decreased 1 percent, while rural counties registered a 5-percent increase.

Three of the four regions reported decreases in the numbers of motor vehicle thefts from 1996 to 1997. The Northeastern States registered a 10-percent decline; the Southern States, a 3-percent decrease; and the Midwestern States, a 1-percent decline. The Western States showed virtually no change. (See Table 4.)

The accompanying chart shows that the volume of motor vehicle thefts in 1997 declined 13 percent from the 1993 volume.

Rate

During 1997, the national motor vehicle theft rate was 506 per 100,000 people. This rate was 4 percent lower than in 1996,

17 percent below the 1993 rate, and 13 percent lower than the 1988 rate.

There were 591 motor vehicle thefts reported in 1997 for every 100,000 inhabitants living in metropolitan areas. Cities outside metropolitan areas recorded a rate of 234, and in rural counties a rate of 129 motor vehicle thefts was reported. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem. The 1997 motor vehicle theft rate was 1,133 for every 100,000 inhabitants in cities with populations over 250,000. A rate of 251 per 100,000 was recorded for the Nation's smallest cities, those with fewer than 10,000 inhabitants.

Regionally, motor vehicle theft rates were 656 per 100,000 people in the Western States, 504 in the Southern States, 436 in the Midwestern States, and 421 in the Northeastern States. A comparison of 1996 and 1997 rates showed declines in all regions. The Northeast reported the greatest rate decrease, 10 percent. The South reported a decrease of 4 percent; the Midwest and the South, a decrease of 2 percent each. (See Table 4.)

Nature

During 1997, the estimated value of motor vehicles stolen nationwide was more than \$7 billion. The average value per vehicle at the time of theft was \$5,416. The recovery percentage for the value of vehicles stolen was higher than for any other property type. Relating the value of vehicles stolen to the value of those recovered resulted in a 67-percent recovery rate for 1997. (See Tables 23 and 24.)

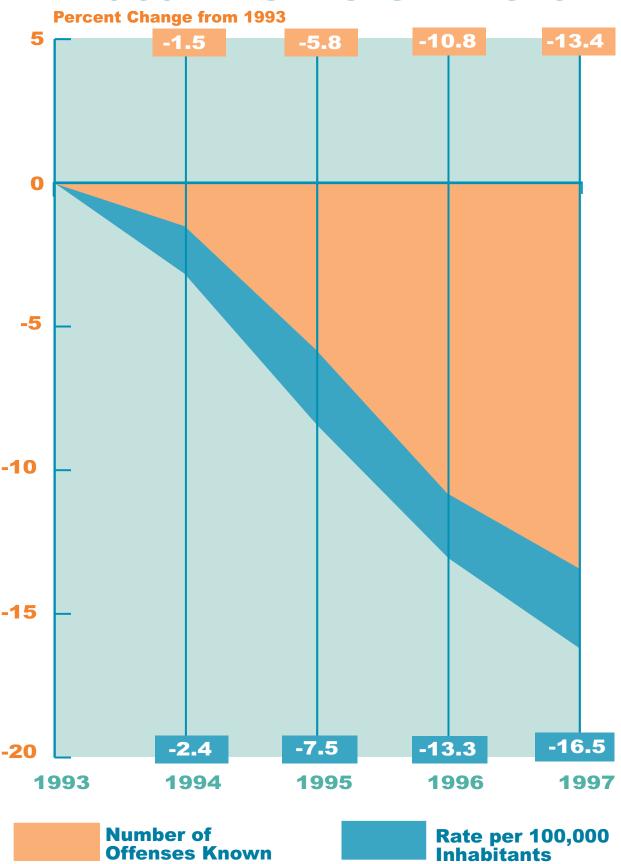

Automobiles accounted for 77 percent of all motor vehicles reported stolen during the year, 18 percent were trucks or buses, and the remainder were other types.

Table 2.30 — Motor Vehicle Theft, 1997 [Percent distribution by region]

Region	Total ¹	Autos	Trucks and buses	Other vehicles

¹ Because of rounding, percentages may not add to total.

Motor Vehicle Theft

Law Enforcement Response

A 14-percent motor vehicle theft clearance rate was recorded by law enforcement agencies nationwide in 1997. Law enforcement agencies in cities cleared 13 percent; those in suburban counties cleared 16 percent; and rural county agencies cleared 31 percent. (See Table 25.)

By geographic region, motor vehicle theft clearance rates were 18 percent for the Southern States, 15 percent for the Midwestern States, and 11 percent for both the Northeastern and Western States.

Persons in the under-18 age group were involved in 21 percent of the motor vehicle thefts cleared nationally. This group also comprised 21 percent of the motor vehicle thefts cleared in cities, and 19 percent of those cleared in both suburban and rural counties.

Law enforcement agencies made an estimated 167,000 arrests for motor vehicle theft in 1997. Eighty-five percent of

those arrested were males. Fifty-eight percent of the arrestees were white, 39 percent were black, and the remainder were of other races.

The younger segment of the Nation's population accounted for a large portion of motor vehicle theft arrestees in 1997. Sixty-nine percent of all persons arrested for this offense were under 25 years of age, and those under 18 comprised 40 percent of the total. Arrests of persons under age 18 were down 14 percent from 1996. Arrests of juvenile males decreased 15 percent, and those of young females decreased 8 percent.

Sixty percent of motor vehicle theft arrests were for adults. This represents a decline of 3 percent from the 1996 figure.

Total motor vehicle theft arrests in 1997 were down 8 percent from the previous year's total. Long-term trends indicate the 1997 arrest total was 19 percent below the 1993 level and 15 percent lower than the 1988 figure.

ARSON

- DEFINITION -

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Law enforcement agencies nationwide reported a total of 81,753 arson offenses in 1997. Among these reporting agencies, 11,461 of the total 11,755 which furnished from 1 to 12 months of reports for the year, provided detailed arson information. Details included such elements as the type of structure and estimated monetary value of the property damaged and provided the data from which the tables on the accompanying pages were tabulated. Tables 12 through 15 present further information regarding arson offenses and trends, and Tables 25 through 28 present additional information on arson clearances. In viewing the arson tables, data users should be aware that the figures, while conservative indicators, do not represent the Nation's total arson experience since only 8,385 agencies covering 67 percent of the United States population submitted arson reports for all 12 months of the year.

Decreases in arson offenses of 7 percent nationally and 6 percent overall in the Nation's cities were reported in 1997. The greatest decrease occurred in cities with populations of 500,000 to 999,999 inhabitants, 17 percent. Decreases in cities of other population groups ranged from 10 to 4 percent. Only cities with populations over 1 million experienced an increase, 1 percent. Both suburban and rural counties registered declines; suburban, 10 percent, and rural, 1 percent. (See Table 12.)

By geographic area, decreases in arson offenses occurred in all areas. The largest decreases occurred in the West, 10 percent, and in the South, 9 percent. Smaller decreases were noted in the Midwest and the Northeast, 2 and 1 percent, respectively.

Table 2.31 — **Arson Rate, Population Group, 1997** [8,385 agencies; 1997 estimated population 178,125,000; rate per 100,000 inhabitants]

Group	Rate
Total	41.2
Total cities	47.6
Group I (cities 250,000 and over)	77.8
(cities 1,000,000 and over)	87.4
(cities 500,000 to 999,999)	57.0
(cities 250,000 to 499,999)	83.5
Group II (cities 100,000 to 249,999)	52.4
Group III (cities 50,000 to 99,999)	36.0
Group IV (cities 25,000 to 49,999)	31.3
Group V (cities 10,000 to 24,999)	23.9
Group VI (cities under 10,000)	27.8
Suburban counties	30.7
Rural counties	17.8
Suburban area	28.2

In 1997, nationally, the number of arsons by property type decreased as follows: all other properties (crops, signs, merchandise stored outside structures, etc.) declined by 8 percent; structural arson declined by 7 percent; and mobile property decreased by 4 percent. (See Table 15.)

Arson trend information should be viewed with caution, particularly as improved arson reporting procedures may have influenced statistical presentations/data. It is expected that year-to-year statistical comparability will improve as collection continues.

Rate

Arson rates per 100,000 inhabitants are tabulated independently because population coverage for arson data is lower than for the other Crime Index offenses. Only figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, are used. (See Table 2.31.)

Nationally, the 1997 arson rate was 41 per 100,000 population. The rates ranged from 87 per 100,000 inhabitants in cities with populations over 1 million to 18 per 100,000 rural county inhabitants. Rates of 48 and 31 per 100,000 inhabitants were recorded in all cities collectively and in the suburban counties, respectively.

By region, the Midwestern States experienced the highest arson rate, 46 offenses per 100,000 population. Arson rates of 44 per 100,000 inhabitants were recorded in the Western States, 40 per 100,000 in the Southern States, and 34 per 100,000 in the Northeastern States.

Nature

Arson directed at structures, accounting for 49 percent of reported incidents, were the most frequently reported arsons in 1997. Arsons directed at mobile property (motor vehicles, trailers, etc.) accounted for 29 percent of reported arson offenses, while other types of property (crops, timber, etc.) accounted for the remaining 23 percent.

Table 2.32 — **Arson, Type of Property, 1997** [11,461 agencies; 1997 estimated population 198,239,000]

Property classification	Number of offenses	Percent distribution ¹
Total	69,269	100.0
Total structure	33,648	48.6
Single occupancy residential	13,692	19.8
Other residential	6,196	8.9
Storage	2,723	3.9
Industrial/manufacturing	363	.5
Other commercial	3,425	4.9
Community/public	3,516	5.1
Other structure	3,733	5.4
Total mobile	19,822	28.6
Motor vehicles	18,708	27.0
Other mobile	1,114	1.6
Other	15,799	22.8

¹Because of rounding, percentages may not add to total.

Residential property arson accounted for 59 percent of the structural arsons during the year, and 41 percent of those offenses were directed at single-family dwellings. Property that was either uninhabited or abandoned at the time of the arson accounted for 20 percent of all targeted structures.

Ninety-four percent of mobile property arsons were directed at motor vehicles.

Property damage, valued at an average of \$11,294 per incident, was attributed to reported arsons in 1997. The overall average loss for all types of structures was \$19,804. Mobile properties averaged \$5,229 per incident, and other targets averaged \$775.

Table 2.33 — Arson, Structures Not in Use, 1997

[11,461 agencies; 1997 estimated population 198,239,000]

Type of structure	Number of offenses	Percent not in use
Total	33,648	19.7
Single occupancy residential	13,692	23.5
Other residential	6,196	16.2
Storage	2,723	24.4

Other structure	3,733	19.2

Law Enforcement Response

The nationwide arson clearance rate in 1997 was 18 percent. A 17-percent clearance rate was registered by law enforcement agencies in the Nation's cities; the highest clearance rate 27 percent, was shown by law enforcement agencies in cities with fewer than 10,000 inhabitants. Clearance rates in rural and suburban county agencies registered 27 and 18 percent, respectively. (See Table 25.)

Table 2.34 — Arson, Monetary Value of Property Damaged, 1997 [11,461 agencies; 1997 estimated population 198,239,000]

Property classification	Number of offenses	Average damage
Total	69,269	\$11,294
Total structure	33,648	19,804
Single occupancy residential	13,692	14,098
Other residential	6,196	14,279
Storage	2,723	52,349
Industrial/manufacturing	363	103,559
Other commercial	3,425	39,265
Community/public	3,516	10,006
Other structure	3,733	9,404
Total mobile	19,822	5,229
Motor vehicles	18,708	5,004
Other mobile	1,114	9,010
Other	15,799	775

By region, clearance rates for the offense of arson were recorded as follows: the Southern States, 22 percent; the Midwestern States and Northeastern States, 16 percent each; and the Western States, 15 percent.

Representing a higher percentage of juvenile involvement than for any other Index crime, 46 percent of all 1997 arson clearances involved only juveniles (persons under age 18). Persons in this age group accounted for 26 percent of the clearances for arsons of mobile property, 45 percent of structural arson clearances, and 60 percent of those of all other property. Forty-eight percent of the city, 46 percent of the suburban county, and 27 percent of the rural county arson clearances were accounted for by juvenile offenders.

Breakdown by type for structural and mobile classifications appear in the accompanying tables which show clearance data

for those 11,461 law enforcement agencies which furnished the information. Table 2.35 indicates that clearance rates for arsons of community/public structures were the highest, 35 percent, while clearance rates for motor vehicles were the lowest, 8 percent.

In 1997, of the estimated 20,000 arrests for arson made nationally, 85 percent of all arrestees were males. Fifty per-

¹ Includes offenses cleared by exceptional means.

cent of the arrestees were under 18 years of age, and 67 percent were under 25. By race of those who were arrested, whites comprised 73 percent of the arrestees, blacks comprised 25 percent, and persons of other races comprised the remainder.

Arson arrest trends for 1997 versus 1996 indicate decreases nationally and in cities collectively of 2 percent each. Rural and suburban counties also indicated decreases of 7 and 3 percent, respectively.

Table 2.36 — Arson Offenses Cleared by Arrest¹ of Persons under 18 Years of Age, 1997

[11,461 agencies; 1997 estimated population 198,239,000]

Property classification	Total clearances	Percent under 18
Total	13,220	46.0
Total structure	8,215 3,437 1,529 571 51 584 1,241 802	44.9 37.6 39.2 55.2 45.1 34.8 73.8
Total mobile	1,750 1,558 192 3,255	25.8 24.0 40.1 59.7

¹ Includes offenses cleared by exceptional means.

From 1996 to 1997, nationwide, juvenile arrests for arson were down 4 percent, and adult arrests showed virtually no change. Arrests of both males and females declined during the same period. Male arrests decreased by 2 percent, and female

arrests decreased by 5 percent. Compared to the 1993 arrest total, the 1997 arson arrest total for all ages remained relatively unchanged; compared to the 1988 total, an increase of 2 percent occurred.

HATE CRIME

— DEFINITION —

A hate crime, also known as a bias crime, is a criminal offense committed against a person, property, or society which is motivated, in whole or in part, by the offender's bias against a race, religion, disability, sexual orientation, or ethnicity/national origin.

Background

In response to a growing concern about hate crimes, Congress, on April 23, 1990, enacted the Hate Crime Statistics Act of 1990. The Attorney General designated the FBI's Uniform Crime Reporting (UCR) Program to develop a hate crime data collection system for its voluntary law enforcement agency data participants which would include data "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity." In September 1994, the Violent Crime Control and Law Enforcement Act amended the Hate Crime Statistics Act to add disabilities, both physical and mental, as factors that could be considered a basis for hate crimes. The disability bias data collection began in January 1997.

Hate crimes are not separate, distinct crimes, but rather traditional offenses motivated by the offender's bias; therefore, hate crime data can be collected by capturing additional information about offenses currently being reported to the UCR Program. Included are the offenses of murder and nonnegligent manslaughter; forcible rape; aggravated assault, simple assault, and intimidation; robbery; burglary; larceny-theft; motor vehicle theft; arson; and destruction, damage, or vandalism of property.

Hate crime data are submitted to the FBI on a Quarterly Hate Crime Report which consists of a quarterly summary and an incident report for each bias incident. Agencies participating in the National Incident-Based Reporting System (NIBRS) are able to include the hate crime data element in their submissions via magnetic tape.

The following statistics are a representation of the data received from law enforcement agencies that provided 1 to 12 months of hate crime reports during 1997. More detailed information concerning characteristics of hate crime can be found in the UCR annual publication *Hate Crime Statistics*.

Nature

In 1997, there were 8,049 hate crime incidents reported to the FBI. Of the 8,049 reported incidents, 4,710 were motivated by racial bias; 1,385 by religious bias; 1,102 by sexual-orientation bias; 836 by ethnicity/national origin bias; 12 by disability bias; and 4 by multiple biases. The 8,049 incidents involved 9,861 separate offenses, 10,255 victims, and 8,474 known offenders. (See Table 2.37.)

Table 2.37 — Number of Incidents, Offenses, Victims, and Known Offenders by Bias Motivation, 1997

Multiple-Bias				
Incidents ³	4	10	40	3

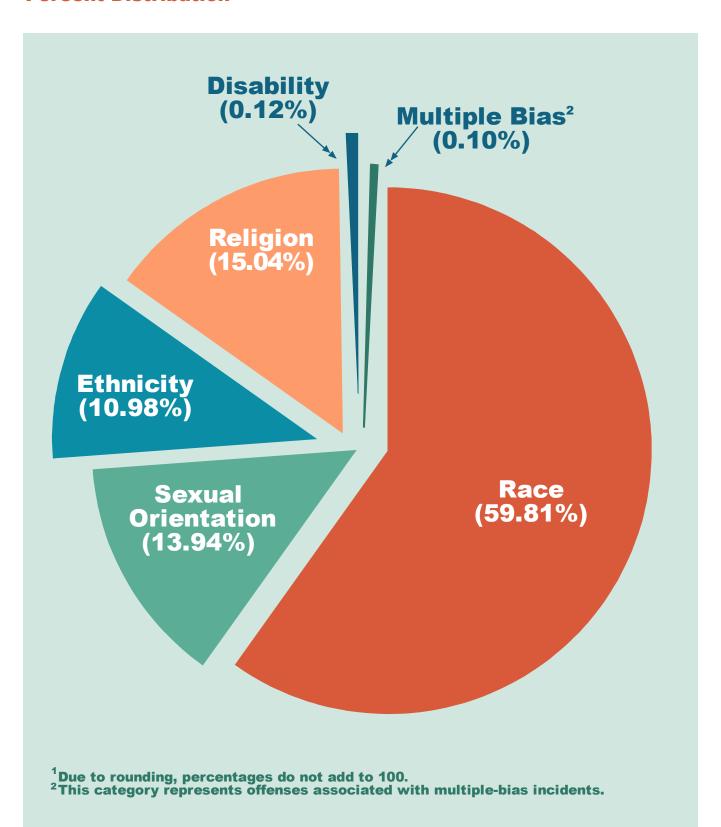

¹ The term "victim" may refer to a person, business, institution, or society as a whole.

² The term "known offender" does not imply that the identity of the suspect is known, but only that an attribute of the suspect is identified which distinguishes him/her from an unknown offender.

³ There were 4 multiple-bias incidents. Within these there were 10 offenses, 40 victims, and 3 known offenders.

Bias-Motivated Offenses 1997

Percent Distribution¹

Crimes against persons accounted for almost 70 percent of hate crime offenses reported. Crimes against property accounted for over 30 percent, while less than one percent were crimes against society. Of the crimes against persons, intimidation accounted for 55 percent, while simple assault and aggravated assault represented 26 percent and 18 percent, respectively. Destruction, damage, or vandalism of property was the most frequently reported offense of crimes against property, accounting for 86 percent of that category. Of all hate crimes, intimidation was the single most frequently reported offense, accounting for 39 percent of the total. Following were destruction, damage, or vandalism of property, 26 percent; simple assault, 18 percent; and aggravated assault, 13 percent. (See Table 2.38.)

In 1997, racial bias represented the largest percentage of bias-motivated offenses. Of the 9,861 reported offenses, 5,898 were motivated by racial bias; 1,483 by religious bias; 1,375 by sexual-orientation bias; 1,083 by ethnic/national origin bias; and 12 by disability bias. Ten offenses were associated with multiple-bias incidents. (See Table 2.37 and Chart 2.18.)

Table 2.38 — Number of Offenses, Victims, and Known Offenders by Offense, 1997

		Number of	
	Offenses	Victims ¹	Known Offenders ²
Total	9,861	10,255	9,1723

Destruction/damage/			
vandalism	2,549	2,888	1,179
Other ⁴	7	7	10
Crimes against society ⁴	15	15	18

¹ The term "victim" may refer to a person, business, institution, or society as a whole.

In 1997, 67 percent of the 10,255 victims were targets of crimes against persons. (See Table 2.38.) Nearly 6 of every 10 victims were attacked because of their race, with bias against blacks accounting for 39 percent of the total. (See Table 2.37.)

Law enforcement agencies reported 8,474 known offenders associated with the 8,049 incidents recorded in 1997. (See Table 2.37.) Of the known offenders, 7,388 were connected with crimes against persons, and 1,766 were associated with crimes against property. Thirty-seven percent of the 8,474 known offenders were involved with the offense of intimidation. (See Table 2.38.) Of the known offenders, 63 percent were white, and 19 percent were black. (See Table 2.39.)

Table 2.39 — Number of Known Offenders by Race, 1997

	•
	Number of known offenders
Total	8,474
Suspected offender's race: White Black American Indian/Alaskan Native Asian/Pacific Islander Multi-Racial Group Unknown Race	5,344 1,629 66 161 306 968

² The term "known offender" does not imply that the identity of the suspect is known, but only that an attribute of the suspect is identified which distinguishes him/her from an unknown offender.

³ The actual number of known offenders is 8,474. (See Table 2.37.) Some offenders, however, may be responsible for more than one offense and are, therefore, counted more than once in this table.

⁴ Includes offenses other than those listed that are collected in NIBRS.

Law Enforcement Participation

The law enforcement community recognizes that valid information is central to developing effective measures to deal with hate crime. Data for 1997 were supplied by 11,211 law enforcement agencies in 48 states and the District of Columbia representing nearly 223 million United States inhabitants or approximately 83 percent of the Nation's population. (See Table 2.40.)

Of the agencies that participated in the hate crime program, 15 percent reported that at least one hate crime occurred in their jurisdiction, while the other 85 percent reported that none occurred. While agency participation in the hate crime program is not complete, their reports offer perspectives on the general nature of hate crime occurrences.

Crime Index Tabulations

The tabular portions of this section show crime data in the following categories: the Nation as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and, college and university campuses. The following tables also provide national averages for the value of property stolen in Crime Index offenses; robbery, burglary, larceny-theft, and arson breakdowns by type; weapon information; and data on the type and value of property stolen and recovered.

While the exact number of crimes occurring within the United States is unknown, criminal activity can be gauged by studying those reported to law enforcement. The reader is cautioned, however, that many factors affect crime volumes and crime types and can cause them to vary from time to time and from place to place. Population, for example, is used in computing crime rates. Since current, permanent population counts are used in their construction, crime rates do not account for transient or seasonal populations. Short-term population variables, such as an influx of day workers, tourists, shoppers, etc. impact all communities to some degree. Other factors contributing to the amount of crime in a given area are discussed on page *iv* of this publication.

One tool law enforcement administrators can use in analyzing local crime counts and the performance of the law enforcement agencies is national data. The analyses, however, should not be based solely on data presented in this publication. True assessments of community crime problems or the effectiveness of

law enforcement operations can only be made through appraisals of local conditions.

Table 1, "Index of Crime, United States, 1978-1997," sets forth national estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past two decades.

Current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas are shown in Table 2, "Index of Crime, United States, 1997." For the definitions of these community types, see Appendix III.

Data showing the geographical distribution of estimated Index crimes and population are provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1997." In reviewing regional figures in this report, the reader must consider each region's proportion of the Nation's total population. For example, not only did the Southern States account for the largest volume of Crime Index offenses in 1997, but they also represented the greatest regional population.

Note

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1997 annual figures are not available for inclusion in tables presenting statistics for the Nation as a whole. Arson totals reported by individual law enforcement agencies are displayed in Tables 8 through 11. Two-year arson trends are shown in Tables 12 through 15.

¹ Populations are Bureau of the Census provisional estimates as of July 1, except 1980 and 1990 which are the decennial census counts.

² Because of rounding, the offenses may not add to total.

³ Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

⁴ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny–theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁵ The 1996 figures have been adjusted. See "Crime Trends," page 402 for details.

Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 401-402 for details.

All rates were calculated on the offenses before rounding.

Table 2. — Index of Crime, United States, 1997

¹Populations are Bureau of the Census provisional estimates as of July 1, 1997, and are subject to change.

Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 401-402 for details.

¹ Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 401-402 for details.

² Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

³ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny–theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting, and crime rates.

² Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

³ Because of rounding, the percentages may not add to totals.

¹Populations are Bureau of the Census provisional estimates as of July 1 and are subject to change and may not add to totals due to rounding.

² Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

³ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny–theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 401-402 for details.

⁵ Includes offenses reported by the Zoological Police.

⁶The 1996 figures have been adjusted. See "Crime Trends," page 402 for details.

⁷ The 1997 Bureau of the Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided. Data for Puerto Rico are not included in totals.

Offense totals are based on all reporting agencies and estimates for unreported areas.

¹ Although arson data were included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

Offense totals are based on all reporting agencies and estimates for unreported areas.

² Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³ Property crimes are offenses of burglary, larceny—theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴ Includes offenses reported by the Zoological Police.

⁵ Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 401-402 for details.

⁶ The 1997 Bureau of the Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided.

¹ Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 401-402 for details.

² Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴ Due to reporting changes or annexations, figures are not comparable to previous years' data.
⁵ Indianapolis/Marion County, Indiana, is a unified city-county government; therefore, their Crime Index figures are combined and are not comparable to previous years' data.

⁶ The 1997 Bureau of the Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,000 inhabitants are

¹ Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 401-402 for details.

² Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

3 Due to reporting changes or annexations, figures are not comparable to previous years' data.

⁴ Indianapolis/Marion County, Indiana, is a unified city-county government; therefore, their Crime Index figures are combined and are not comparable to previous years'

⁵ Arson figures for 1997 for Massachusetts are not comparable to previous years' data.

¹ The student enrollment figures provided by the United States Department of Education are for the 1996-1997 school year, the most recent school year available. The enrollment figure includes full-time and part-time students. See Appendix I for details.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

² Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴ Student enrollment figures were not available.

⁵ Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, South Dakota, and Vermont; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 401-402 for details.

Table 10. — Number of Offenses Known to the Police, Suburban Counties, 1997

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.] *Arson is shown only if 12 months of arson data were received. Dashes (—) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non- negligent man- slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny– theft	Motor vehicle theft	Arson*

¹ Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, New Hampshire, and Vermont; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 401-402 for details.

² Due to reporting changes or annexations, figures are not comparable to previous years' data.

Table 11. — Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1997

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]
* Arson is shown only if 12 months of arson data were received. Dashes (—) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non- negligent man- slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny- theft	Motor vehicle theft	Arson*

¹It is not necessary to report arson by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

² Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³ Property crimes are offenses of burglary, Larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Includes state police agencies with no county breakdowns.

⁵ Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other properties.

Population figures were rounded to the nearest thousand.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont. See "Offense Estimation," pages 401-402 for details.

¹It is not necessary to report arson by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont. See "Offense Estimation," pages 401-402

Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont. See "Offense Estimation," pages 401-402 for details.

² Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³ Property crimes are offenses of burglary, Larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴ Offenses include sheriffs' and county law enforcement agencies. State police offenses are not included.

⁵Less than one-tenth of 1 percent.

Population figures were rounded to the nearest thousand.

¹ Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 56 of this publication.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines. See Appendix I for details.

Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont. See "Offense Estimation," pages 401-402 for details

² Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³ Property crimes are offenses of burglary, Larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴ Includes state police agencies with no county breakdown.

⁵ Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

¹ Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 56 of this publication.

² Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups. Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines. See Appendix I for details. Complete data for 1997 were not available for the states of Illinois, Kansas, Kentucky, Montana, New Hampshire, and Vermont. See "Offense Estimation," pages 401-402 for details.
